## Description

**Artifact.**  
Multi-Perspective  
Governance  
***TRUST***  
Connected Autonomy  
1969–2020  
***Living in a world where data is currency***  
decentralized  
**Social Network**

We are in this impasse of giving up control and giving up our data vs being connected. That is the struggle that a lot of companies and people have right now. This decentralized network allows for selectively/controlled participation, creating connected autonomy.

We are in this impasse of giving up control and giving up our data vs being connected. That is the struggle that a lot of companies and people have right now. This decentralized network allows for selectively/controlled participation, creating connected autonomy.
